CONTENTS

Introduction VII

Pangaean divergent margins: historical perspective
E. Uchupi and K.O. Emery (Woods Hole, Mass., U.S.A.) 1

Dynamic modeling of divergent margin formation: application to the U.S. Atlantic margin
D.S. Sawyer and D.L. Harry (Houston, Texas, U.S.A.) 29

Magmatic–tectonic evolution of a volcanic rifted margin
O. Eldholm (Oslo, Norway) 43

Rise and demise of the Bahama–Grand Banks gigaplatform, northern margin of the Jurassic proto-Atlantic seaway
C.W. Poag (Woods Hole, Mass., U.S.A.) 63

Stratigraphic evolution of Mesozoic continental margin and oceanic sequences: Northwest Australia and northern Himalayas
F.M. Gradstein (Dartmouth, N.S., Canada) and U. von Rad (Hannover, Germany) 131

Cenozoic prograding sequences of the Antarctic continental margin: a record of glacio-eustatic and tectonic events
A.K. Cooper (Menlo Park, Calif., U.S.A.), P.J. Barrett (Wellington, New Zealand), K. Hinz (Hannover, Germany)
V. Traube and G. Leitchenkov (Leningrad, U.S.S.R.) and H.M.J. Stagg (Canberra, Australia) 175

Eustatic controls on carbonate facies in reservoirs, and seals associated with Mesozoic hydrocarbon fields of the Arabian Gulf and the Gulf of Mexico
C.G.St.C. Kendall (Columbia, S.C., U.S.A.), B. Bowen (Houston, Texas, U.S.A.), A. Alsharhan (Al Ain, United Arab Emirates), D.-K. Cheong (Columbia, S.C., U.S.A.) and D. Stoudt (Houston, Texas, U.S.A.) 215

Depositional, tectonic and eustatic controls on hydrocarbon distribution in divergent margin basins: Cenozoic Gulf of Mexico case history
R.A. Morton and W.E. Galloway (Austin, Texas, U.S.A.) 239

Seawater circulation through the flank of the Florida Platform: evidence and implications
C.K. Paul (Chapel Hill, N.C., U.S.A.), J.P. Chanton (Chapel Hill, N.C., and Tallahassee, Fla., U.S.A.) and C.S. Martens, P.D. Fullagar, A.C. Neumann and J.A. Coston (Chapel Hill, N.C., U.S.A.) 265

Lithium: sources in pore fluids of Peru slope sediments and implications for oceanic fluxes
J.B. Martin and M. Kastner (La Jolla, Calif., U.S.A.) and H. Elderfield (Cambridge, U.K.) 281

Evidence from fluid seeps atop serpentine seamounts in the Mariana Forearc: Clues for emplacement of the seamounts and their relationship to forearc tectonics
J.A. Haggerty (Tulsa, Okla., U.S.A.) 293

Mesozoic evolution of exotic terranes and marginal seas, western North America
K.M. Wilson (Bryn Mawr, Pa., U.S.A.) and W.W. Hay and C.N. Wold (Kiel, Germany) 311
